

# CLASSROOM NEWS

week of: Week 7 10/6/22

## Mindfulness

After lunch, we often do something called mindfulness colouring. It is when our teacher puts on some relaxing music and lets us do some colouring or drawing. Mindfulness is a chance for us to relax and have a nice time and I like it very much.

## Class meetings

Every two weeks, our teacher organises something called a class meeting on Friday. Class meetings are when we all push the tables back and sit in a big circle in our seats. We do votes, talk about what is going well and what is not and most importantly, we get our say. I love class meetings and I am very happy to have them.

## Math games

I like doing math games because it is making math into something fun and entertaining! I also like that it is a way to memorise my maths!

## Spelling baseball

Spelling baseball is technically a spelling test cross, well, baseball except not sports. There are two teams in spelling baseball. Everyone pairs up and swap spelling words before splitting up; one partner on one team and the other on the other. While one team stays in their seats, the other lines up at the front with no spelling words in their hands. One partner asks the other partner (the one at the front of the line) a word off their list and they have to try spell it. If they get it right, they move to the first base, if they get it wrong, their team gets a cross and goes to the back of the line. They lose if they get three crosses. There are three bases but you can't have two people on one base so if there are, one person moves to the next base and so on. But when someone gets past the third base, then their team gets a point. So that is how you play!
